Videojuicer and The Videojuicer Logo are Copyright (©) [Videojuicer](#) 2012. All Rights Reserved.  
Videojuicer for Wordpress Plugin , Version 1.3.0

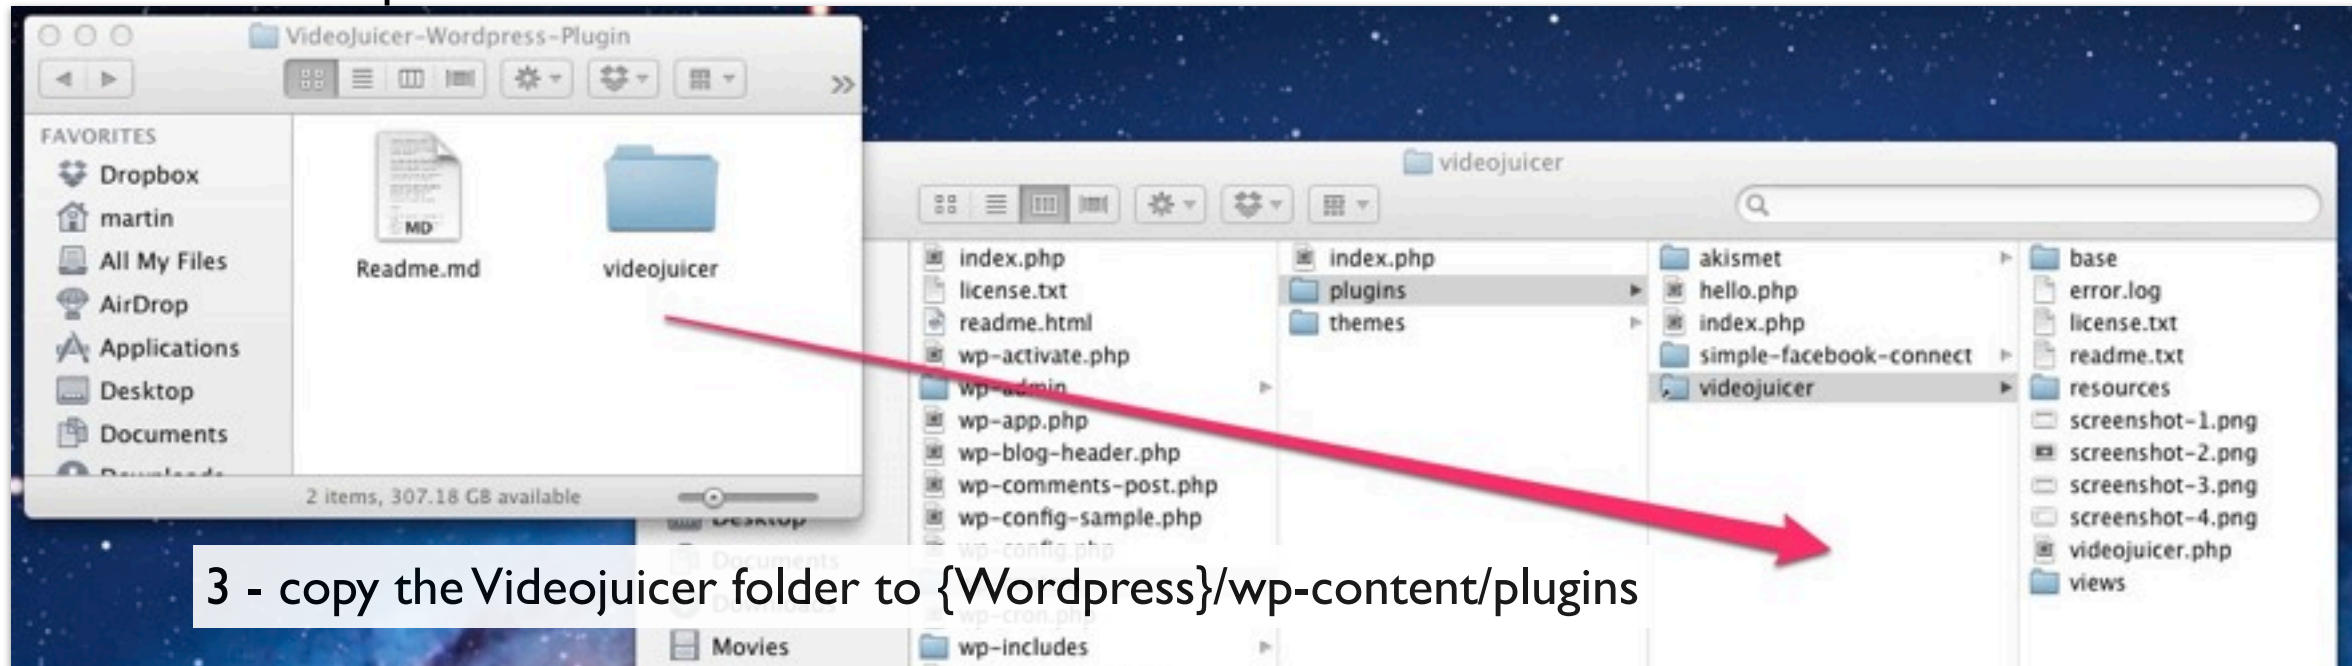

WORDPRESS

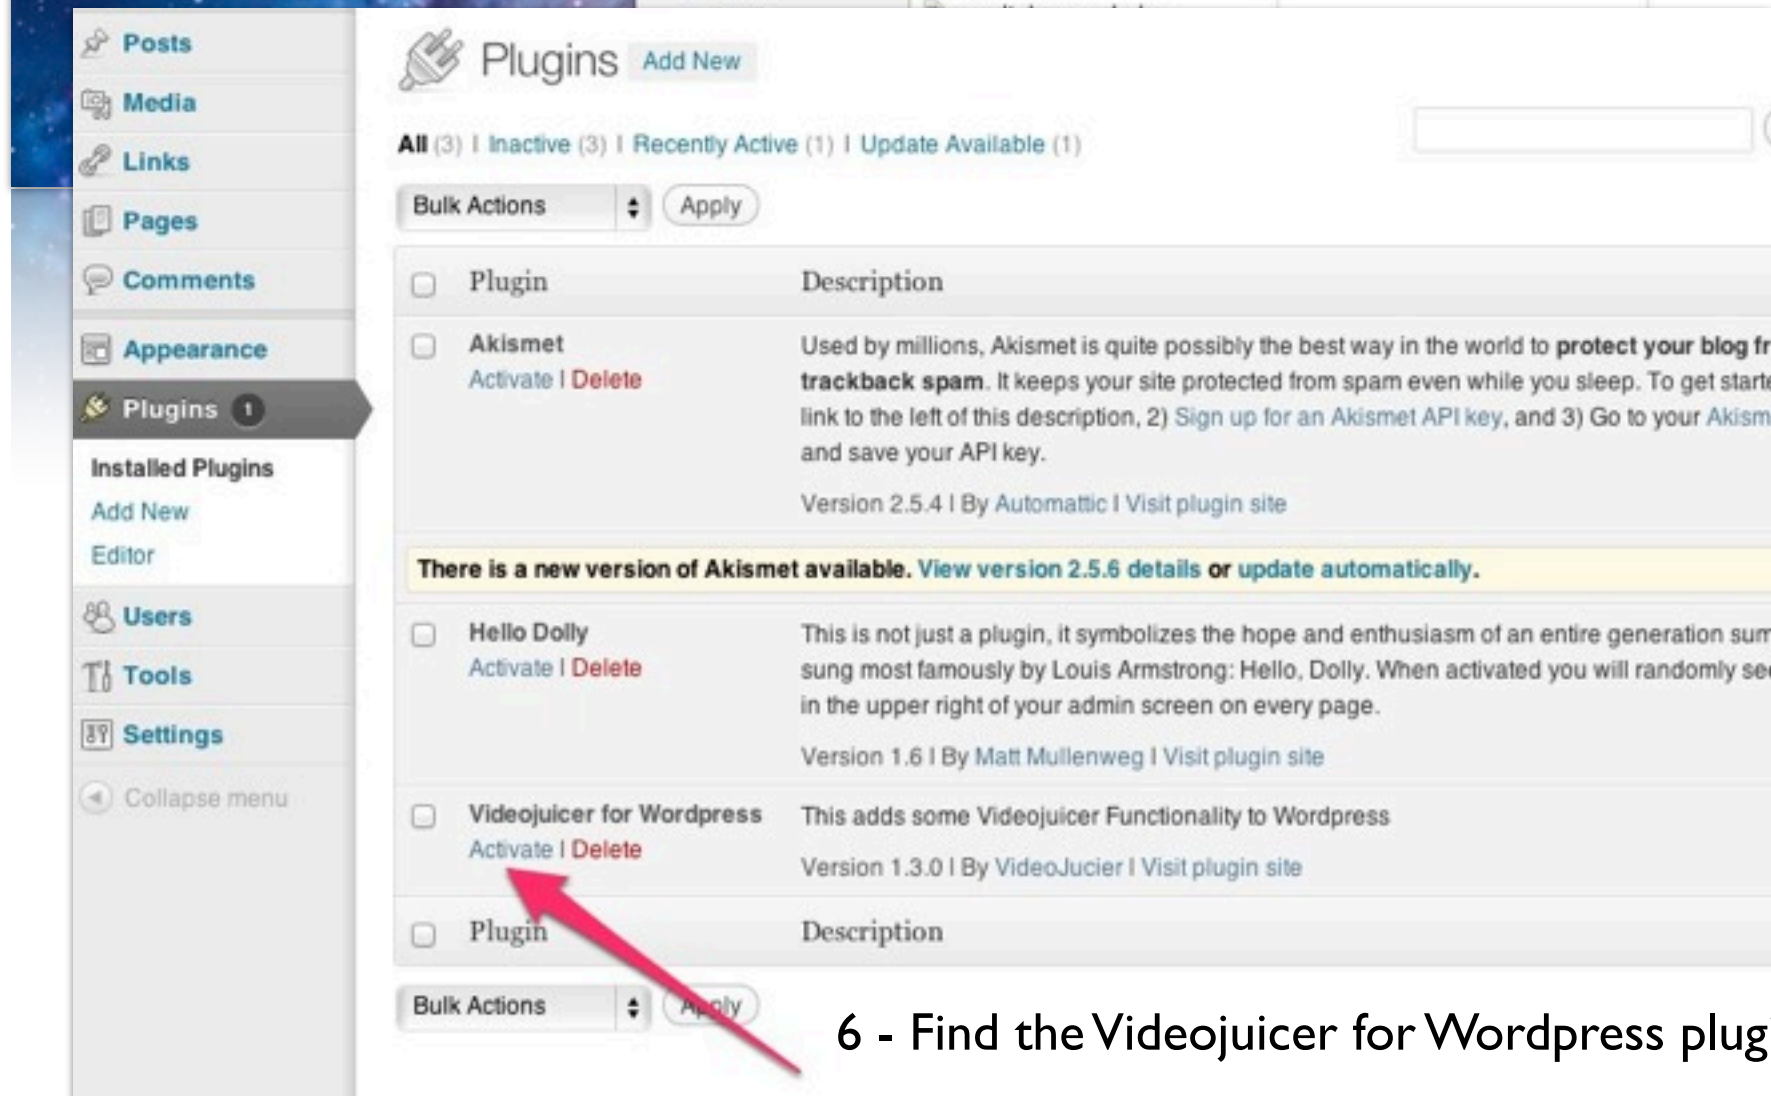

Visual Quick Start Guide

# Installing

- 1 - Download our Wordpress plugin from (<https://github.com/videojuicer/VideoJuicer-Wordpress-Plugin/zipball/master>)
- 2 - extract the zip file

- 3 - copy the Videojuicer folder to {Wordpress}/wp-content/plugins

- 4 - Visit your Wordpress admin normally at <http://yourdomain.com/wp-admin>

- 5 -Click the plugins menu on the left of the screen

- 6 - Find the Videojuicer for Wordpress plugin , and click Activate

# Configuring

These options allow you to automatically show some metadata under the video.

*Please note: this metadata must be stored by Videojuicer*

Your seed name, if you are unsure as to what this is please contact Videojuicer.

The default dimensions that the video needs to be embedded at.

Whether you want to include Facebook Open Graph tags and Oembed tags.

*Please note: These settings may not work with other Facebook plugins installed.*

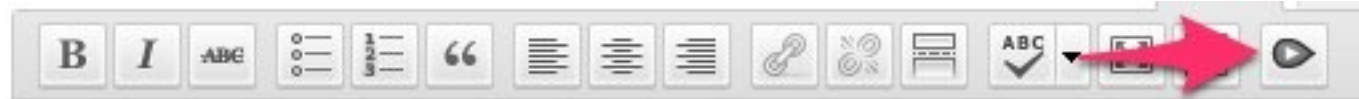

**Don't Forget to Save**

The screenshot shows the 'Settings' page for the Videojuicer WordPress plugin. The left sidebar contains a menu with options: Posts, Media, Links, Pages, Comments, Appearance, Plugins (1), Users, Tools, and Settings (highlighted). Below the menu are sub-categories: General, Writing, Reading, Discussion, Media, Privacy, Permalinks, and Videojuicer. The main content area is titled 'VIDEOJUICER' with a play button icon. It has two sections: 'Account Details' and 'Settings'. In 'Account Details', there is a 'Seed ID' field with the value 'demo' and a label 'Your Seed Id'. In the 'Settings' section, there are three checkboxes: 'Show Title' (checked), 'Show Author' (checked), and 'Show Description' (checked). Below these are 'Default Embed Dimensions' with 'Width' and 'Height' input fields. There are also two checked checkboxes: 'Add the facebook opengraph data.' and 'Add the oembed data.'. At the bottom of the settings section is a 'Save Changes' button. The footer contains copyright information: 'Videojuicer and The Videojuicer Logo are Copyright (©) Videojuicer 2012. All Rights Reserved.' and 'Videojuicer for Wordpress Plugin , Version 1.3.0'. Red arrows point from the text annotations to specific elements: one to the 'Seed ID' field, one to the 'Show Title' checkbox, one to the 'Width' and 'Height' input fields, one to the 'Add the facebook opengraph data.' checkbox, one to the 'Add the oembed data.' checkbox, and one to the 'Save Changes' button.

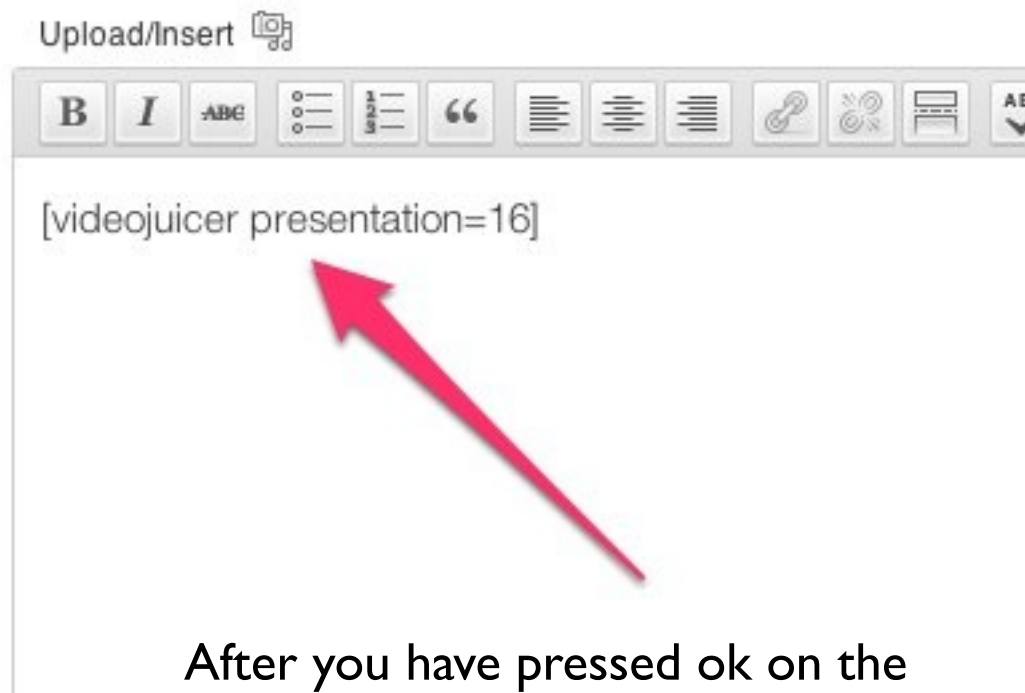

# Usage

When creating a new post, you will now see the Videojuicer tool icon in the toolbar

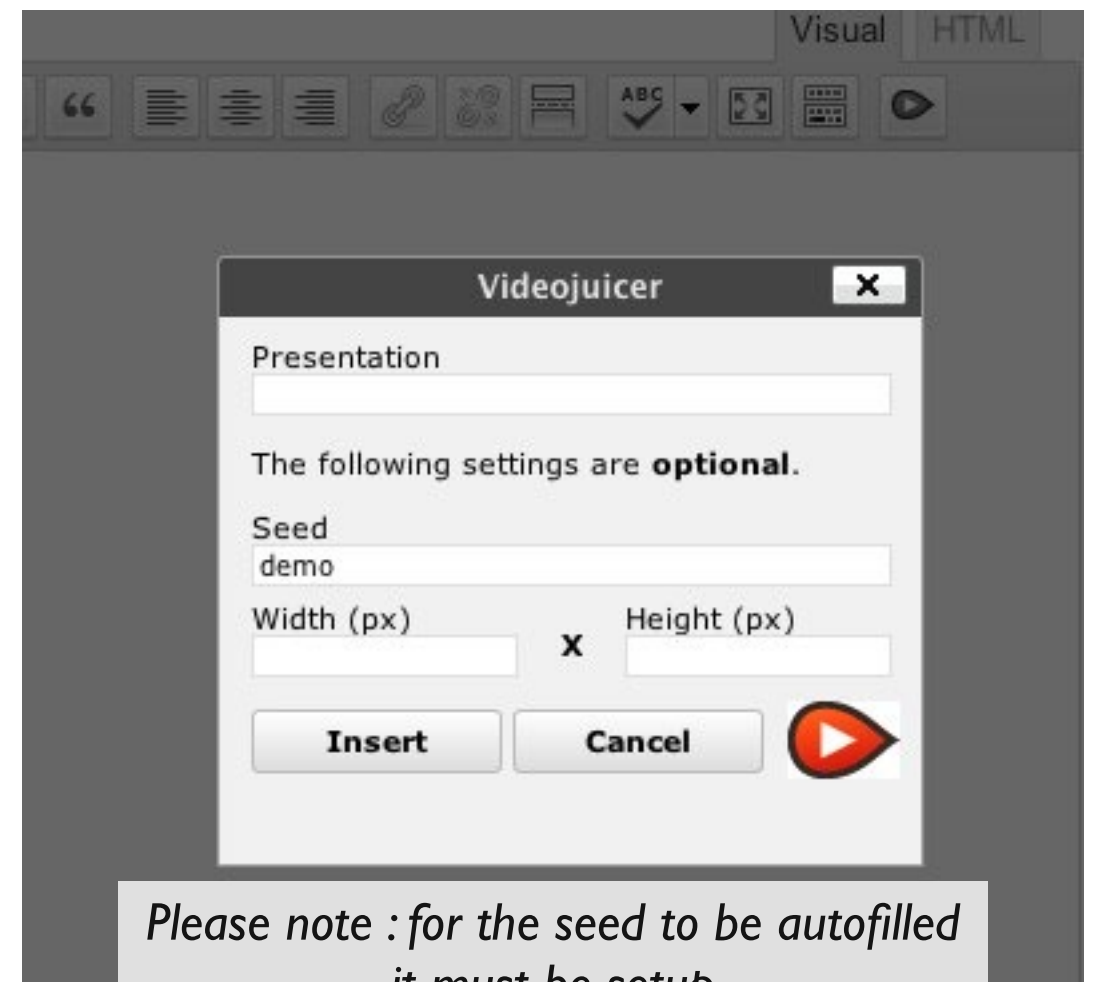

When you click it, you will see our easy to use dialogue. Simply enter the presentation Id under presentation. You can also change the width , height and seed if needed

After you have pressed ok on the dialogue it will automatically insert the short code , this is link to where your presentation is. The presentation will automatically be insert into your post when someone views it.

*Don't be concerned if your shortcode doesn't look the same as above. depending on the settings and options you selected it will change.*

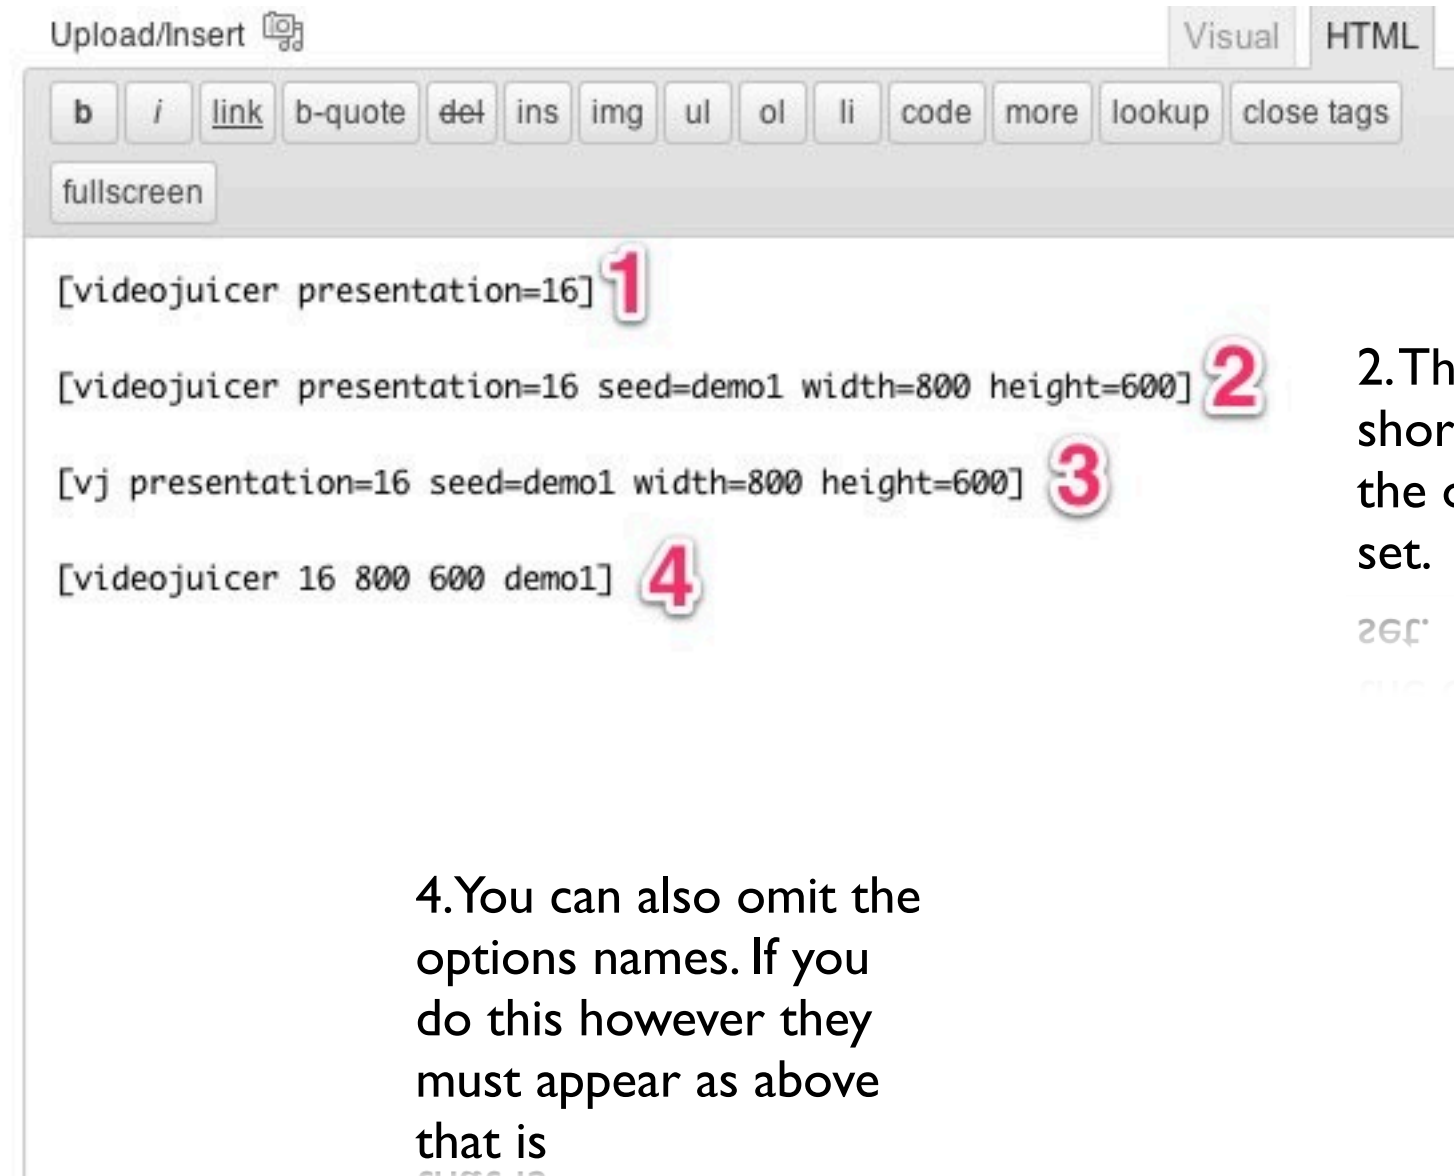

*Please note : for the seed to be autofilled it must be setup*

# Advance Usage

If you are an advance Wordpress user , you may want to put the shortcodes in manually

1.This is the basic shortcode that we saw before. As long as the seed is setup in the configuration this is all you need.

3. If you want or need you can simply use “vj” instead of “videojuicer”

2.This is a full shortcode showing all the options that can be set.

4.You can also omit the options names. If you do this however they must appear as above that is

*[videojuicer {presentation id} {width} {height} {seed}]*
